Professional Summary

Results-driven **Senior Software Developer** with over **6+ years of experience** in designing, developing, and testing scalable web and mobile applications. Skilled in **React JS, JavaScript, jQuery, and API integration** with a strong focus on user experience, performance optimization, and security. Quick learner with a versatile approach to adapting new technologies and delivering quality solutions within deadlines.

Professional Experience

Company - **CreditAccess Grameen Bank**

Deputy Manager | *May 2026 – Present* | Bangalore, karnataka

Project: Unnathi – National e-Governance Services (NeSL) Integration

- Gathered and analysed project requirements for the Unnathi digital lending platform, acting as the primary liaison with **the National e-Governance Services Limited (NeSL)** team.
- Managed the end-to-end NeSL API lifecycle — collecting user details, structuring payloads, and securely transmitting data to the NeSL portal.
- Engineered an in-app navigation flow that seamlessly redirects borrowers to the NeSL website for **Aadhaar-based e-sign authentication**.
- Fetched and displayed signed loan agreements upon successful digital verification, providing real-time document preview to the user.
- Implemented a one-click secure document download feature, enabling borrowers to save their certified agreements locally.

Company - Zenithbyte Innovations Pvt. Ltd.

Senior Software Developer | *May 2025 – May 2026* | Chennai, Tamil Nadu
Project: ClarityAI – User Tracking Module

- Leading development of a **user activity tracking module** to monitor interactions, device insights, and behavioral analytics across the platform.
- Built an **event-driven architecture** capturing clicks, scrolls, searches, form events, hesitations (hover ≥ 3 s), and inactivity.
- Implemented a **secure, anonymized data pipeline** with geolocation, browser/OS detection, and device fingerprinting.

- Designed a **common API wrapper** featuring real-time performance monitoring, retry logic, and circular tracking prevention.
- Enhanced **error tracking** and diagnostics to improve system uptime and reliability.
- Integrated **IP + browser geolocation fallback** for privacy-aware, permission-based location accuracy.
- Added **Text-to-Speech feedback** and accessibility enhancements to improve usability.
- Engineered **real-time cart analytics** capturing product and transaction data via DOM extraction.

Company - I-exceed Technologies Pvt. Ltd.

Software Developer | *Feb 2020 – May 2025* | Bangalore, Karnataka

Project- 1. United Commercial Bank (Bangladesh) | *Nov 2020 – Jun 2021*

- Developed **Internet and Mobile Banking applications** with advanced features using **React JS**.
- Designed login and registration workflows with CRUD operations and service-based user validation.
- Integrated **Loan Service APIs** for application and eligibility checks based on existing dues.

Project- 2. L&T Finance – Two-Wheeler Loan Journey | *Jun 2021 – May 2023*

- Created a **project structure and Git branching strategy** for scalable front-end development.
- Implemented **API integrations** using AJAX for dynamic content rendering and user interactivity.
- Utilized **Geolocation API** to retrieve user location from PIN codes and plot them on maps.
- Developed **document upload** and validation modules with callback response handling. **Project- 3. Consumer Retail Banking – Appzillon** | *Jun 2023 – Nov 2023*
- Designed and developed a **base Internet and Mobile Banking framework** reused across multiple projects.
- Implemented **credit/debit card application** and **cheque book service** workflows with DB integration.
- Built **multilingual support** enabling dynamic language translation across the application.

Project- 4. Indian Bank Corporate | *Nov 2023 – Mar 2024*

- Created mobile-friendly UI layouts using **HTML, CSS, and Xcode** for iOS.
- Developed beneficiary management with **account validation and API-based fund transfer integration**.
- Implemented **OTP authentication** with input validation and error handling. **Project- 5. Central Bank of India** | *Apr 2024 – Jan 2025*
- Built **profile management** and **KYC verification modules** with PAN/AADHAR validation via eKYC API.
- Enhanced **input validation, pincode, and phone checks** for accuracy and security.

- Implemented **deposit management workflows** (FD/RD) with email (SMTP) authentication.
- Developed **language localization** by dynamically mapping terms to a translation file.

Project- 6. Grameen Koota – Unnathi | *Jan 2025 – May 2025*

- Designed dashboard interfaces with **role-based filtering and data visualization**.
- Implemented **pagination logic** and reusable utility functions to improve performance.

Technical Skills

Programming: JavaScript (ES6), jQuery, AJAX
Frontend: React JS (Hooks – useState, useEffect, useContext, useRef, useParams)
Web Technologies: HTML 5, CSS 3, Bootstrap, Semantic UI
API Integration: REST API, HTTP Services, AJAX Requests
Version Control: Git, GitHub
Tools: Postman, Xcode (iOS), VS Code
Concepts: Responsive Design, Geolocation API, Form Validation, Localization, Accessibility

---

Education

Bachelor of Engineering (B.E.) – Computer Science & Engineering
Sri Shakthi Institute of Engineering and Technology (Anna University) | 2016 – 2020

HSC & SSLC | *Perks Matriculation Higher Secondary School* | 2013 – 2016
